

# Izopump® 1K

Single Component Electric Pneumatic Injection Pump

# MASTER INJECTOR

**izopump**  
injection pumps®

*Izopump 1K is a high performance and ease to use model, mostly due to its high flow rate and special ergonomic design. Utilising professional motor powered equipment, it is best choice for the reliable injection specialist.*

## TECHNICAL SPECIFICATIONS:

Motor Power:	800 W / 1100 W
Voltage / Frequency:	220 V, 50/60 Hz
Power Cord:	2 x 1.5
Max. Flow:	850 gr / min.
Max. Pressure:	200 bar
Application Pressure:	400 bar
Operating Temperature:	0 °C - 40 °C
Weight:	13 Kg.

*Above values may vary depending on operating conditions.*

## PRODUCT DESCRIPTION

*Designed especially for easy and fast injection of single component polyurethane and epoxy synthetic resin to the concrete structures. Despite being very compact and powerful, it develops pressure gradually pumping 850 ml per minute, is extremely light weight and easy to carry along even in basement or confined areas.*

*In addition to the suction hose and 3,5 LT reservoir tanks being detachable, making it easy to maintain and cleaning conveniently.*
